Disk seats

Unless you have one of the best swivel car seats for the elderly, that is! This adaptive equipment is simple and affordable, and will help both your elderly loved ones and those with limited mobility maintain their independence. Those who have conditions such as arthritis , multiple sclerosis, or osteoarthritis, which can limit their mobility will love using these seats, as they reduce strain otherwise placed on the hips and back. This can help a variety of people, from those who suffer from hemorrhoid pain to those with prostate inflammation, sit more comfortably for longer periods of time. Some swivel seats have two layers that are joined together with a swivel, acting like turntables as they twist around to allow for easy exit and entry. Others are made of slippery materials, which helps to ease body movements. Swivel seats or cushions can be used on multiple surfaces, but are ideal for getting into and out of a car. These sitting aids work best on flat surfaces and may require adjustments in a car that has concave, bucket-style seating. Swivels also tend to perform best in two or three-door cars, because the doors are often wider. If you get into an accident while driving, you could slide off and injure yourself. Additionally, insurance companies may require you to notify them if you require a specialized or adaptive piece of equipment while driving. There are many swivel seat options available and finding the right one for your car and individual needs can be tricky. We write about products we think our readers will like. If you buy them, we get a small share of the revenue from the supplier. The beauty of the Sammons Preston transfer and pivot disc is that it converts any seat â€" an office chair , a dining chair , and yes, a car seat, too â€" into a swiveled chair. Portable and durable, this inch disc enables you to get up and down without pain. Its non-slip, grooved material reduces any unwanted movement, making it ideal for those with mobility issues. This disc can support individuals up to pounds, allowing them to twist and turn with minimal to no assistance. Getting my wife in and out of her wheelchair and in and out of our car has been extremely difficult until now. The Sammons Preston transfer and pivot disc works exactly as advertised and has made both hers and my life much, much easier. With the Drive Medical deluxe swivel car seat , you can easily transport passengers into different vehicles without the usual struggle. It allows for degrees of turning and has a soft, velvet cover over polyurethane foam. Additionally, it has a weight capacity of pounds. Then I just swivel myself and both legs into the car! Reduce the strain on your back and hips with HealthSmart's Deluxe swivel car seat. The inch foam cushion swivels degrees in any direction, and is lightweight and portable. It can support up to pounds, and comes with a non-skid flexible swivel base that contours to the seat, so the user never has to worry about it shifting at an inopportune time. It makes getting in and out of the car so much easier. Because of the slick surface, [you can] scoot your butt in to the car, and then rotate your legs. Don't waste your money on one that does not have a slick surface. A quality, compact swivel cushion that will fit within a bucket seat is hard to find. Made from hardened stainless steel, HealthSmart's compact swivel car seat helps to reduce any undue pressure placed on your back and tailbone. It also increases your height so you can see the road better. Plus, it's made of high-grade foam that not only holds its shape, but feels soft and comfortable on your bottom. The DMI Deluxe is a inch firm foam cushion that will fit larger chairs and car seats and swivels degrees to provide smooth, easy movement in either direction. In addition to working well in cars, it's plenty versatile: use it at the office or during travel for a cozy, comfortable place to rest. It's portable and lightweight, but supports weights up to pounds. Stay cozy and secure as you ease your way in and out of a seated position with the Pivit swivel car seat cushion. Made from a durable foam that holds its shape, it's soft and comfortable, reducing pressure on your back and tailbone to curb back and hip strain. There's a slip-resistant design, and, best of all, the removable cover is machine washable, ensuring your cushion will always stay in pristine condition. As an added benefit, its with memory foam is packed with cooling gel to stop you from overheating â€" a super handy feature for those who live in warmer climates! Simple and soft, Medline's swivel seat is ideal for those who crave comfort during long travel. It has a slip-resistant base, so you'll never have to worry about it slipping and sliding around beneath you. Another bonus? It supports individuals up to pounds. The cover is machine washable, making it a simpler than ever to keep your swivel seat fresh and clean. See more of our best product recommendations. Skip to content. Who can use a swivel car seat? A versatile line of high-performance, corrosion-resistant rupture discs, our composite discs are ideal for systems that require lower burst pressures than standard discs can provide. Our composite rupture discs consist of two or more metallic or non-metallic components. The components typically consist of a metallic top section and a metallic or non-metallic seal with optional vacuum support, protective rings, gaskets or outlet liner. This rupture disc features a flat seat design for superior metal-to-metal sealing. We manufacture several preformed composite rupture discs to fit numerous applications. The metallic top section can be manufactured from various materials, depending on your application and corrosion-resistance requirements. Seals, protective rings, gaskets and outline liners can also be manufactured from a variety of materials to meet your needs. Contact us or see our preformed composite rupture disc brochure for complete details. This unique configuration, in combination with the pre-cut sections along the dome, provide non-fragmenting characteristics when used with a non-metallic or fluoropolymer seal. Various seal material options, such as fluoropolymers and exotic metals, help ensure excellent corrosion resistance. Provides corrosion protection and excellent performance in low-pressure applications where no back pressure or vacuum is expected. Provides process side support for full vacuum conditions. PL type â€" Similar to CDC type, with the addition of a corrosion-resistant fluoropolymer liner placed on the outlet side of the top section. PLV type â€" Same design as the PL type, with the addition of a vacuum support on the outlet side of the top section. The outlet liner is positioned above the vacuum support, protecting the metallic top section and the vacuum support from corrosive elements in the atmosphere. Burst Pressure Range: 2 psig â€" psig 0, barg â€" 99,3 barg. Materials not indicated or shown may be available by special design. Contact us for more information. Our rupture discs are manufactured with chemical processing in mind â€" corrosion resistance, leak tightness, high accuracy and durability come standard. We understand that product purity and safety are critical in food-related industries, so we provide hygienic and aseptic vessels and piping to assure compliance with FDA and 3A requirements. The hydrocarbon industries require cost-effective system protection with a special focus on reducing fugitive emissions. Our catalog of configurations, materials, burst ratings and sizes make our rupture discs the right choice for these operations. We focus on solutions to meet the stringent requirements of pharmaceutical processing â€" wherever perfectly hygienic facilities and hermetically sealed antiseptic systems are a must. Disc valves often referred to as eccentric disk valves, or as high-performance butterfly valves are a variation on the butterfly design intended to improve seat shut-off. Thus, tight shut-off of flow is possible even when using metal seats and disks. The following photograph shows the body of a Fisher E-plug control valve, with the disk i
