Call: Get a Demo Buy Now. This suite of Web-based products for the medium- and heavy-duty trucking segments helps service professionals estimate labor times, diagnose and repair all makes of Class 4 through 8 trucks. In a single application, with a single login, technicians can access all of the information that they need to repair trucks. Based on our decades of expertise delivering industry-leading repair information, TruckSeries is a time-saving solution that helps professional truck mechanics with every aspect of the repair process, from diagnosis to completion. TruckSeries is the only comprehensive solution for the commercial trucking segment, covering all makes from forward. It can help you shorten repair times, increase the number of repairs that your technicians can do, and work more efficiently to grow your business. Now you can stop flipping pages, swapping disks or calling a service line. Estimates are faster and easier with the TruckLabor module of the TruckSeries truck maintenance software package. The Estimator tool lets you customize labor rates for services, and deliver estimates quickly and accurately. Identify areas of your shop that need improvement by measuring technician productivity to see how well your business is performing. RepairConnect is the diagnostic procedures module in TruckSeries, and it delivers everything you need to quickly diagnose trouble codes. You will spend less time diagnosing, and benefit from easier repairs with exclusive, industry-leading features such as full color, scalable wiring diagrams, and high resolution photos of components, locations and pin connectors. Torque specs are a click away from your repair information. All of this comes in a user-friendly interface that makes it easy to learn and use. You can accelerate productivity and profits even more when you combine TruckSeries with Manager SE Truck Edition , the shop management system for Class that helps you keep track of all the moving parts in your truck repair shop. TruckSeries is professional, medium- to heavy-duty truck repair information software that supplies technicians with industry-leading estimating, diagnostic trouble code and repair information in a single application. It, like ProDemand auto repair information, is powered by the advanced search technology, 1Search Plus. It has a user-friendly graphical layout that makes it easy for technicians to instantly find the information they need for a diagnosis and repair. A library of information is available with a single login; TruckSeries is the only comprehensive solution for the commercial trucking segment. TruckSeries is available only through Mitchell 1. For pricing, visit our online purchase page , and please be sure to speak with a sales representative for a free demo and to see what current promotions can be applied to ensure you get the best deal for your operation. TruckSeries is a suite of web-based products all designed to provide service professionals labor times, diagnostics and complete repair information for all makes of Class 4 through 8 trucks. Including the ability to do plate-to-VIN lookup and decoding, full color and interactive wiring diagrams, full color high resolution photos, labor estimating and much more! Many photos used in the TruckSeries products are made possible by the generous support of Universal Technical Institute. ShopConnection Home. Photos â€" Take the guesswork out of repair jobs.
